

Milestone 1: Project Planning and Environment Setup

Objective

To prepare the ServiceNow development environment and create the foundation for the Employee ID Card Request Management application.

Step 1: Create Personal Developer Instance (PDI)

Navigation:

1. Visit developer.servicenow.com
2. Sign in or create a developer account.
3. Request a Personal Developer Instance.
4. Wait for instance activation.
5. Login using admin credentials.

Step 2: Create Scoped Application

Navigation:

System Applications → Studio

1. Open Studio.
2. Select Create Application.
3. Enter:

Application Name:

Employee ID Card Request Management System

4. Click Create.

Learning Outcomes

- Understood ServiceNow architecture.
- Created a scoped application.
- Configured development environment.
- Learned Studio basics.
